In the letter of the law cash money belongs to the man who has it in his possession. Even if he stole a \$100 bill from you the court would make you prove that the particular \$100 bill was yours and that it was stolen.

Not so with a check on your bank. The root of the rightful owner of a check is particularly desig nated. Found or stolen, it is not the property of the finder or the thief-it is the propery of the payee, and a wrongful possessor must show a good and sufficient reason why he has it.

# To Those Who Judge Quality by Price

The quality of Ford cars cannot be judged by the prices at which they are sold—because Ford prices are made possible by conditions that are absolutely unique in the automotive industry.

From mine to market the Ford car is the work of a single organization. The Company owns and operates the mines and forests that furnish the raw materials for its products. This material is carried over Ford transportation routes, fabricated in Ford mills, manufactured in Ford plants—and the finished product is sold to the public through Ford dealers.

The following statement, previously made in an advertising message, is repeated because of its significance to the public:

"If any other manufacturer endeavored to produce a car similar to the Ford, according to the high standards of quality in material and workmanship used by the Ford Motor Company and with the same tried and proved design, it would be impossible to offer it at any-thing like Ford prices. And it is well to note that even with less costly design they have not met Ford prices."
